

Northwestern University
Econ 315: Topics in Economic History
The Israeli Economy
Professor Oren Levintal
Spring 2023

General Description

In this course, we will examine the Israeli economy and its evolution over the past seven decades since the establishment of the State of Israel. We will explore how the economy has navigated through various challenges, including the Israeli-Arab conflict and the inflation crisis. Through an application of core economic concepts and theories, we will analyze economic growth, balance of payments and stabilization policies. By the end of the course, you will have gained a comprehensive understanding of the Israeli economy and its place in the global economic landscape.
